This product earned the ENERGY STAR by meeting strict energy efficiency guidelines set by the U.S. EPA. U.S. EPA does not endorse any manufacturer claims of healthier indoor air from the use of this product.

The energy efficiency of this ENERGY STAR qualified model is measured based on a ratio between the model's CADR for dust and the electrical energy it consumes, or CADR/Watt.

Este producto obtuvo la designación de ENERGY STAR al haber cumplido con los estrictos lineamientos de eficiencia de energía establecidos por la Agencia de Protección del Medioambiente (EPA) de los Estados Unidos. La Agencia de Protección del Medioambiente de los Estados Unidos no respalda ninguna afirmación por parte del fabricante en el sentido de que el uso de este producto proporciona aire interior más sano.

La eficiencia de energía de este modelo que reúne las condiciones de ENERGY STAR se mide según la relación entre el CADR (Índice de emisión de aire limpio) para polvo del modelo y la energía eléctrica que consume, es decir CADR/Watt.

Ce produit a reçu la certification ENERGY STAR en satisfaisant aux directives strictes de rendement énergétique établies par l'EPA aux É.-U. L'EPA aux É.-U. ne garantit pas l'engagement du fabricant relatif à un air plus sain du fait de l'utilisation de ce produit.

Le rendement énergétique de ce modèle certifié ENERGY STAR est mesuré sur la base d'un ratio entre le débit d'air purifié (poussière) du modèle et l'électricité consommée, ou le ratio débit d'air purifié/Watt.

AIR PURIFIER SAFETY

Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to potential hazards that can kill or hurt you and others.

All safety messages will follow the safety alert symbol and either the word "DANGER" or "WARNING."

These words mean:

⚠ DANGER

You can be killed or seriously injured if you don't immediately follow instructions.

⚠ WARNING

You can be killed or seriously injured if you don't follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

IMPORTANT SAFETY INSTRUCTIONS

WARNING: To Reduce The Risk Of Fire or Electrical Shock, Do Not Use The Air Purifier With Any Solid-State Speed Control Device.

WARNING: To Reduce The Risk Of Fire Or Electrical Shock And Injury To Persons, Do Not Use In A Window.

Unplug air purifier before servicing.

READ AND SAVE THESE INSTRUCTIONS

INSTALLATION REQUIREMENTS

Electrical Requirements

⚠ WARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

Electrical Connection

To properly install your air purifier, you must determine the type of electrical connection you will be using and follow the instructions provided for it here.

- The air purifier should be connected to a 115 V, 60 Hz, 15- or 20-amp fused 3 prong grounded outlet.
- The use of a time-delay fuse or time-delay circuit breaker is recommended.

Location Requirements

A. 6" (15.2 cm) minimum clearance

- You will need a level surface at least 6" (15.2 cm) from heat sources such as ranges or heaters.
- Do not block air openings or place air cleaner on a soft surface such as a bed or sofa.
- Operate indoors only.

AIR PURIFIER USE

Starting/Stopping Your Air Purifier

NOTE: Before operating the air purifier, record the date of installation on the HEPA filter. Under normal conditions, the HEPA filter should be replaced annually, and the pre-filter should be replaced every 3 months. To remove and replace either filter, see "Filter Replacement" in "Air Purifier Care."

A. Low fan speed
B. Medium fan speed

C. High fan speed
D. HEPA filter indicator light

E. Pre-filter indicator light
F. Filter reset button

⚠ WARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

1. Plug into a grounded 3 prong outlet.
NOTE: Both filter indicator lights will flash once during a self-test when the air purifier is turned on or after a power interruption.
2. Turn the control knob to the large fan icon (High), the middle fan icon (Medium) or the small fan icon (Low) to select the desired fan speed.
3. Turn the control knob to Off to turn off the air purifier.

AIR PURIFIER CARE

Cleaning

- A. Release tabs
B. Control knob
C. Mainframe assembly
D. Bottom slot
E. HEPA filter
F. Pre-filter
G. Front grille

1. Turn the control knob to Off.
2. Unplug air purifier or disconnect power.
3. Place fingers on the front release tabs. Gently push the tabs in and pull the front grille forward to remove it.
4. Remove both filters and set aside. Do not try to wash and reuse either the HEPA filter or the pre-filter.
5. Clean the air purifier with a soft, damp cloth.
6. Gently wash the front grille in soapy water.
NOTE: The grille is not dishwasher safe.
7. Reassemble the filters as shown in the previous illustration.
8. Place the bottom tabs on the front grille into the slots in the base of the air purifier. Push the top of the grille forward until the grille locks into place.
9. Plug in air purifier or reconnect power.
10. Turn the control knob to the desired fan speed.

Filter Replacement

NOTE: The filter indicator lights on top of the air purifier will glow when it is time to replace either the pre-filter or the HEPA filter. For the most efficient operation of the air purifier, under normal conditions it is recommended that you replace the pre-filter every 3 months and the HEPA filter every year. See “Replacement Filters” in the “Assistance or Service” section.

1. Turn the control knob to Off.
2. Unplug air purifier or disconnect power.
3. Place fingers on the front release tabs. Gently push the tabs in and pull the front grille forward to remove it.
4. Remove and replace the indicated filter. Install the new HEPA filter in the same direction shown by the arrow located on the filter frame. Install the new pre-filter by placing it on the tabs.
NOTE: Do not try to wash and reuse either the HEPA filter or the pre-filter.
5. Place the bottom tabs on the front grille into the slots in the base of the air purifier. Push the top of the grille forward until the grille locks into place.
6. Plug in air purifier or reconnect power.
7. Turn the control knob to the desired fan speed.
8. Press the Filter Reset button for 5 seconds to turn off the filter indicator light(s) and reset the timer.

NOTES:

- Pressing the Filter Reset button before either of the filter indicator lights glows will not reset the timer.
- Use of a non-Whirlpool filter or failure to replace the filter regularly will invalidate this warranty.

TROUBLESHOOTING

First try the solutions suggested here and possibly avoid the cost of a service call...

Air purifier will not run

■ Check the following:

Is the air purifier turned on?

Is the power cord plugged into a grounded 3 prong outlet?
Has a household fuse blown, or has a circuit breaker tripped?
Replace the fuse or reset the circuit breaker. If the problem continues, call an electrician.

Was a regular fuse used? Use a time-delay fuse or time-delay circuit breaker.
