All Rights Reserved. Printed In China.

**Includes: 1 Curling Wand, 3 Wide Strips (for loose curls), 3 Medium Strips (for medium curls) and 3 Thin Strips (for tight curls).**

1. To begin, hair should be damp. If you hair is dry, simply spray with water to dampen it.

2. Lock both pieces of curling wand together. Select the desired size of Celebrity Curling strip. Wide strips will produce loose curls and thinner strips will produce tighter, spiral curls.

3. Squeeze the edges of one end of the curling strip to create an opening. Then push the Celebrity curling wand through it. See Diagram A.

4. With one hand take a section of hair closest to the scalp and twist it.  
**NOTE:** A smaller section of hair will achieve a tighter curl. Then place the section into the hook of the wand while raising the wand to keep hair from falling out. See Diagram B.

5. Now squeeze the end of the Celebrity Curling Strip nearest the hook to open. While pushing the end of the strip toward the scalp, immediately pull the wand out of the curling strip. See Diagram C. Release the curling strip, it will now resume its natural, spiral shape. **NOTE:** Short hair does not have to go fully through any Curling strip. Hair can be shorter than the curling strip.

6. Repeat with the rest of your hair for a desired look. Your Celebrity Curls curling strips can be placed at random or on the entire head. They can also be used halfway down the length of hair for longer hair.

7. Once you are finished placing curling strips, dry with blow dryer or simply air dry. Dry time varies from 5 to 20 minutes depending on the texture and length of hair.

8. To remove each curling strip, simply hold the end of the curling strip nearest the scalp and straighten. Now squeeze the edge of the strip open and slide the strip down away from the head in one swift, smooth motion. Repeat until all curling strips are removed. Now you will have the Celebrity Curls you've always dreamed of having!
