

## ANIMAL & PEST CONTROL CAR-MOUNTED MARTEN REPELLER

### QUICK GUIDE

PSLSAR5

*Thank you for purchasing our newest Car-Mounted Marten Repeller. Please read the instructions before use.*

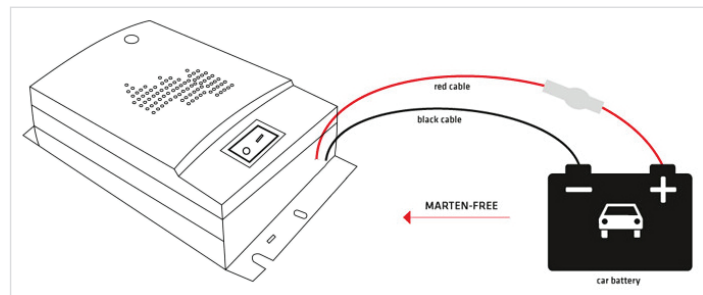

#### 1. DESCRIPTION

The product is hard wired and powered by your vehicle's battery. It is convenient, effective and environmentally friendly. You will have no worry of rodent problems from now on. This item will drive marten, and other rodents away from your car and garage. It emits ultrasonic waves that causes the marten to feel uncomfortable and run away.

This device is supplied with mounting and wiring hardware to connect to the car's battery. There are two cables. The **red cable should be clamped to the positive electrode** and **the black cable be clamped to the cathode**. The unit automatically switch off while the car is running and then automatically switch on emit ultrasonic wave once the car turns off as a result of the included vibration controller that monitors this.

#### 2. WORKING

This item has low power consumption. The sounds are hardly perceptible to the human ear and keep the marten rodents away from the vehicle and rooms. It protects cables, wires and other rubber parts from rodent damage.

#### 3. NOTICE

- A) Please clean the car or room if there has been previous rodent activity due to the potential for residual smells.
- B) Dismantle the device before cleaning your vehicle.
