Use this cable for the best experience
If connecting to a Fire TV, you can
adjust the soundbar's settings in the
Fire TV Settings menu.
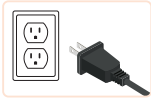

Power cord

2 AAA
batteries

Soundbar wall mounting accessories
*See the mounting instructions*

POSITIONING THE SOUNDBAR

Place your soundbar under your TV
on a piece of furniture or mount it
to the wall.

For the best sound, position it
near ear level.

CONNECT TO YOUR TV WITH HDMI

1. Plug in the power cord

Plug the included power cord into your soundbar's power port and then a power outlet.

2. Plug the HDMI cable into your TV's HDMI ARC/eARC port

- Find your TV's ARC/eARC port. Plug the included HDMI cable into it.
- Plug the other end into your soundbar's HDMI port.
- Check that your TV's HDMI CEC setting is enabled.

> **Important:** Only your TV's HDMI ARC/eARC port will work with the soundbar.
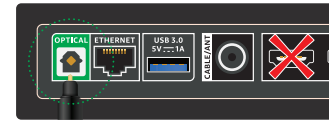

3. Select soundbar's HDMI input

Press the input button ⊡ on the soundbar or the soundbar remote until the HDMI option is selected.

OTHER TV CONNECTION OPTIONS

OPTICAL
Use if your TV doesn't have an HDMI ARC/eARC port. Dolby Atmos and DTS:X aren't supported.

1. Plug an optical cable* into your TV's and soundbar's optical ports.
Optical cable sold separately.

2. If using a Fire TV, go to the Settings and select Equipment Control > Manage Equipment > Amazon Fire TV Soundbar to finish setup.

BLUETOOTH
HDMI or optical cables must be unplugged to use. Dolby Atmos and DTS:X aren't supported.

1. Press and hold the Bluetooth button on the soundbar or remote until the LED blinks blue in discovery mode.

2. In the TV's Bluetooth settings, select Fire TV Soundbar Plus.

SOUNDBAR WALL MOUNTING ACCESSORIES

Paper wall mounting template
Sized to the device
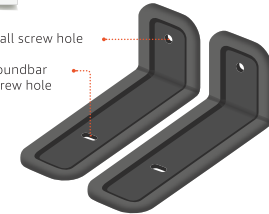

Wall screw hole
Soundbar screw hole

2 anchors   2 wall screws   2 soundbar screws   2 brackets

Note: Included screws and anchors are recommended for drywall. If using the anchors, do not drill into studs.

MOUNTING THE SOUNDBAR ON THE WALL

Tools you'll need
Not included in the box

Electric drill
- 5/16" (or 8 mm) drill bit
- Phillips #2 driver bit

Hammer

Level or level app
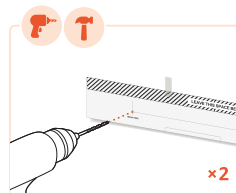

Wall-safe tape

Warning: Do not drill into wiring or piping.

**1. Level and tape the paper template to the wall**
Using a level or level app, position and tape the template to the wall under your TV.

2. Drill holes and install anchors
If you're using the anchors, drill holes where the template says **MARK HERE**.

After drilling both holes, remove the template and tap the anchors into the holes with a hammer.
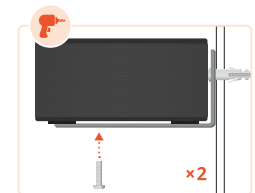

×2

---

3. Attach the brackets to the wall
Insert the included wall screws into the brackets' wall screw holes.

Screw the wall screws into the anchors until the brackets are firmly attached.

×2

4. Position the soundbar on the brackets
Carefully line up the soundbar screw holes on the brackets and the bottom of the soundbar.

5. Attach the soundbar to the brackets
Screw the soundbar screws into the bracket's and soundbar's soundbar screw holes until secure.
