Getting started

Audio joystick
Lets you control music, adjust volume and access your voice assistant – on the back of your right ear cup.
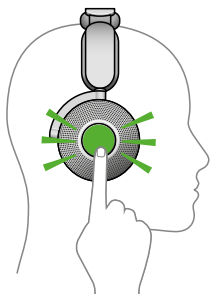

Download the MyDyson™ app
Control your environment – wherever you are. Access live reporting on air quality and noise, check the status of your battery, filter life and more.

Ergonomic ear cup
Angled at minus 13° and oval-shaped to sit over the ear.

Electrostatic carbon filter

Auto-activity mode
Control airflow for your activity. Use the button on the left ear cup to scroll through the airflow control, or use the app.

Twist and release filter cover
For hygienic and easy filter replacement.

Contactless visor
Attaches to supply purified air.

Transparency mode
To switch to Transparency mode, double tap either ear cup. Surrounding sounds are amplified.

USB-C charger
Charge your headphones using the USB-C cable.

Slide adjustor
Adapts to different face shapes and sizes.
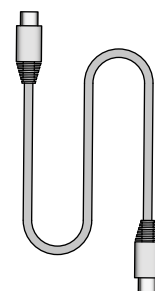

Assembling your headphones

Insert your filters
Twist off both ear cup covers, anti-clockwise.

Hold the filters on the plastic edges and secure them
into the ear cups.

Replace the covers and twist them clockwise to secure
into position.

Adjust your headphones
Put your headphones on.

Adjust the headband, sliding both sides until you
have a comfortable fit.

Attach visor
Remove any packaging from the
visor and fully extend the visor arms.
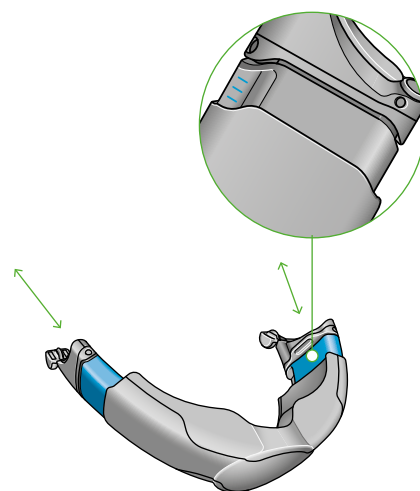

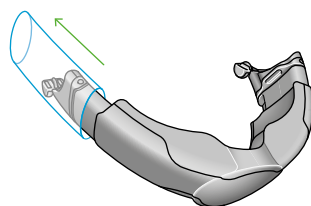

With the visor positioned below your mouth,
attach it to each ear cup with the
magnetic connectors.

Push the visor up to cover your nose and mouth.

x2

dyson

Adjust visor
Adjust the visor until it's in a comfortable position,
close to – but not touching – your face. The airflow
will start automatically.

Pairing your headphones

Connecting to the MyDyson™ app
Download the MyDyson™ app from the App Store
or Google Play. Open the app and follow the
on-screen instructions to create a new account.

If you already have an account, select
'Add machine' and follow the instructions.

Apple and the Apple logo are trademarks of Apple Inc., registered
in the U.S. and other countries. App Store is a service mark of
Apple Inc., registered in the U.S. and other countries. Google Play
and the Google Play logo are trademarks of Google Inc.
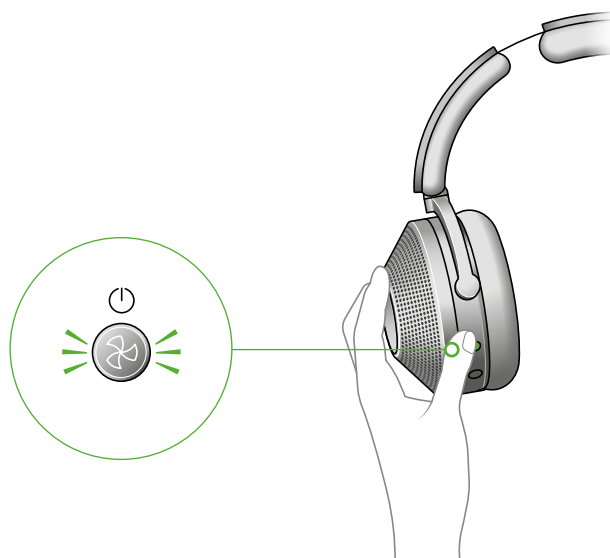

Turn on your headphones
Press and hold the Airflow button on your left ear cup
to turn on the power. The LED light will turn white.

You can turn them off by holding down the airflow
button for 5 seconds when you are not using them.
Holding it down for a further 5-10 seconds will
reset your headphones.

Pair your headphones
Press and hold the airflow button until the LED
light starts to pulse blue.

Your MyDyson™ app will alert you when pairing
is complete.

Connect audio using Bluetooth®
Open Bluetooth® in your mobile device's
settings menu. Check that Bluetooth® is
turned on and select your Dyson Zone™
headphones.

When your device has connected to your
headphones, return to the MyDyson™ app.

Charging your headphones

Your headphones will need to have more than 20% charge to run purification.

You can check charge level by pressing the airflow button.

Battery life
The battery life of your headphones with air purification will improve with use. Allow at least 5 hours of initial use to achieve the best runtime performance.
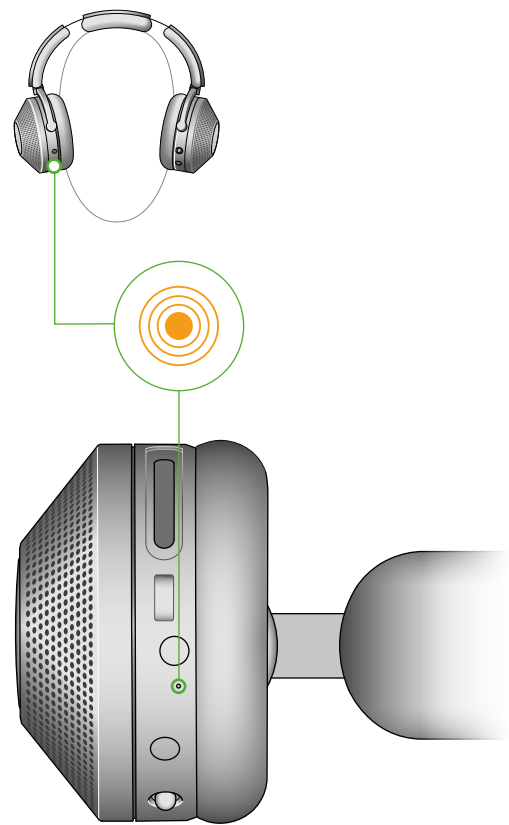

Action and LED behaviour

Battery is more than 20% charged
The LED will turn green.

Battery is less than 20% charged
The LED will turn a solid amber for five seconds.

Charging
When connected to a power supply and charging, the LED will pulse amber. When fully charged, the LED will turn green and then fade to off.

Insufficient charge for purification
The LED will flash amber for five seconds.

Airflow control

Your Dyson Zone™ headphones with air purification will detect your level of activity and adjust the airflow automatically. You can also choose to adjust the levels manually.

Use your MyDyson™ app to select Auto, or adjust the modes manually. Alternatively, use the button on the back of the left ear cup to select modes.

Increased airflow setting.

2 Light

Moderate
Highest available airflow setting.

3 Moderate

Battery life
Your battery life will be extended by using low airflow speeds.

1

Using audio

To play audio through your headphones, you'll need to either connect them using Bluetooth® or the audio cable.
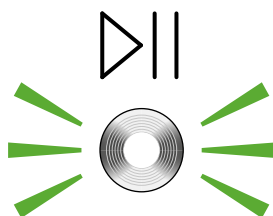

You can play audio through your headphones without the visor being attached.

Use the audio button
Control your audio using the MyDyson™ app or the joystick on the back of your right ear cup.
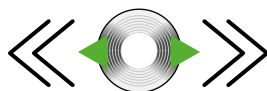

Play and pause
Press the middle of the joystick to play. Press it again to pause.

Skip and seek
Tap the joystick on the left or right to skip tracks. Press and hold to fast forward or rewind.

Volume
Push the joystick up or down to adjust the volume.

Activating voice assistant
Press and hold the middle of the joystick to activate the voice control on your mobile device.

Active noise cancelling

Use Active noise cancelling (ANC) to
reduce the background noise around you.

Isolation mode
The maximum level of ANC, reducing surrounding
and background noise. This is the default setting
for your headphones.

Transparency mode
To toggle to Transparency mode, double tap
either ear cap. Surrounding sounds are amplified.

Conversation mode
Flip the visor down to pause airflow, audio and
noise cancelling. Voices are amplified so you can
hear with your headphones on.

Audio joystick

How to use the Audio joystick
Control your audio using the joystick
on the back of your right ear cup.

Filter needs changing
Pink LED – pulse.

Alerts

Seek Dyson support
Red LED – flash for 5 seconds.

Update installing
White LED – pulsed flashing.

In-flight adaptor

Connect the In-flight cable to the 2-pin adaptor, then plug into the plane's entertainment system via the audio port.

The In-flight adaptor will only charge your Dyson Zone™ headphones with air purification when the USB-C cable is also used.

Please note that the audio controls on your Dyson Zone™ headphones with air purification will not function when the In-flight adaptor is in use.
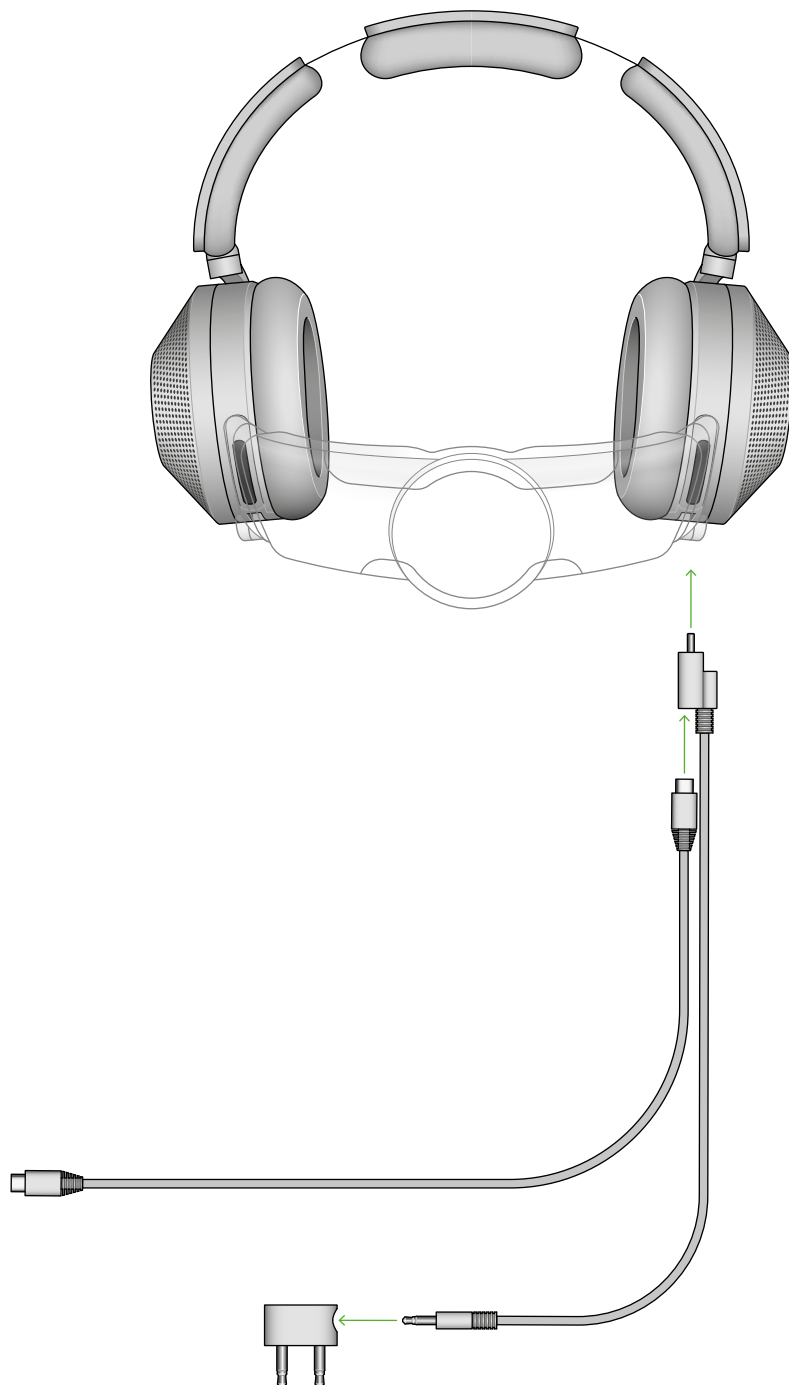

⚠ Warning

The In-flight 2-pin adaptor is for connection to an audio outlet only. Plugging in to a mains socket outlet may result in a fire or pose a risk of an electric shock.

Changing your filters

Filter life
Your MyDyson™ app and headphones will alert you when your filter life is running low. The filter life will depend on the amount of time you use your headphones and the level of your activity.

Your filters are not washable and should be replaced once the MyDyson™ app has alerted you to do so.

Remove the cover
Twist the covers on the ear cups until they release.

Remove the filters
Lift out the filters carefully. Avoid dropping any dust into the ear cups. Dispose of the filters.

Insert filters
Remove the new filters from any packaging and place in the ear cups.

Replace the covers and twist clockwise to lock into position.

Once you have changed your filters it is important to remember to reset your filter life in the MyDyson™ app.
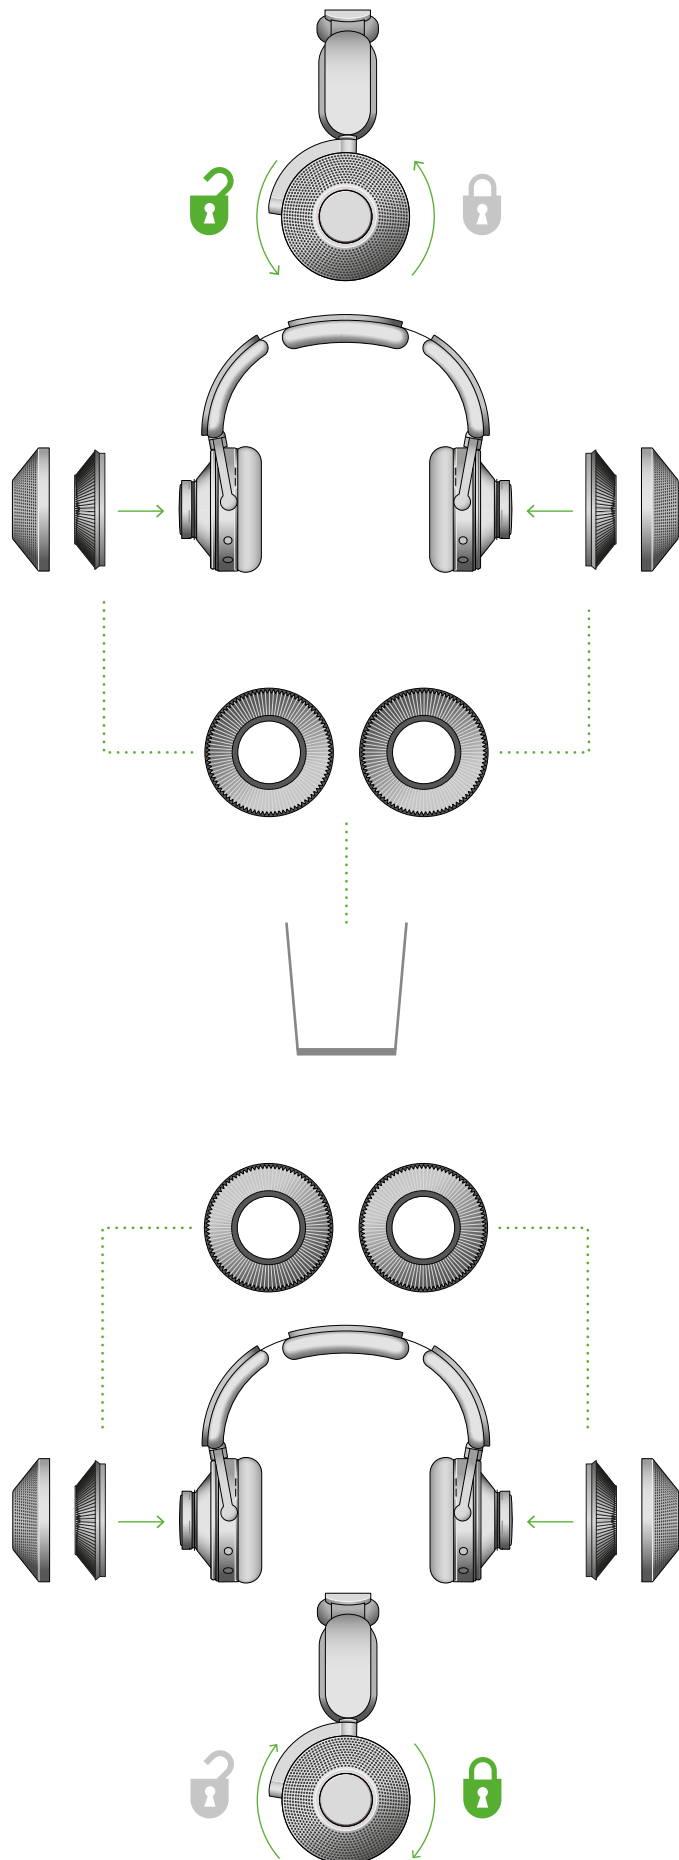

Cleaning your Dyson Zone™ headphones with air purification

It is important to carry out regular cleaning of your headphones to maintain maximum performance. Allow enough time to dry your headphones before you need to use them again.

Due to the materials and manufacturing processes used, your machine inclusive of the packaging, may produce a slight odour.
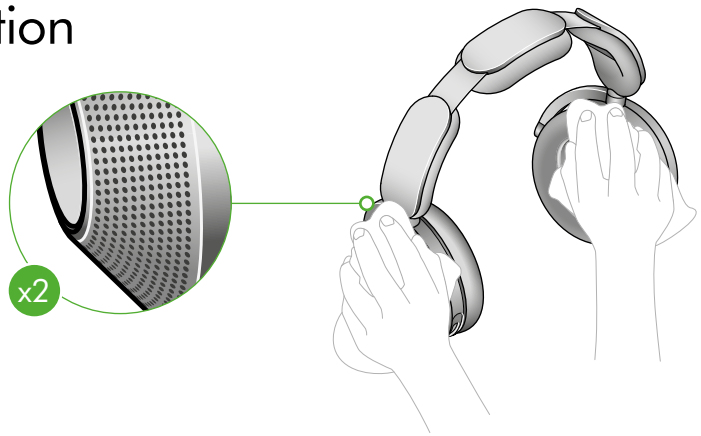

Quick clean

Ear covers
Wipe away dust or debris from the perforations in the ear cup covers with a soft, damp, lint-free cloth.

Ear cushions
Wipe away dust or debris with a soft, damp, lint-free cloth.
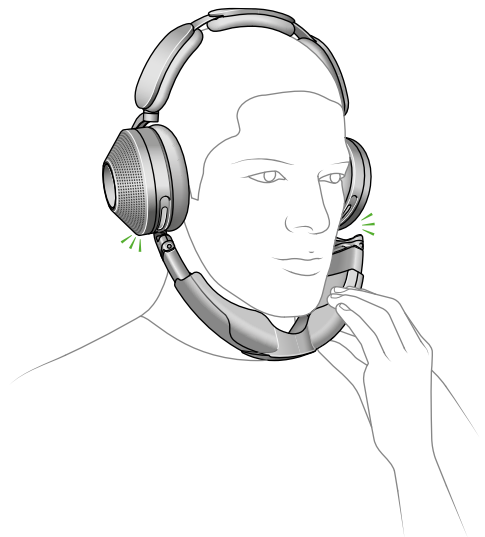

Visor
Wipe away dust or debris with a soft, damp, lint-free cloth.

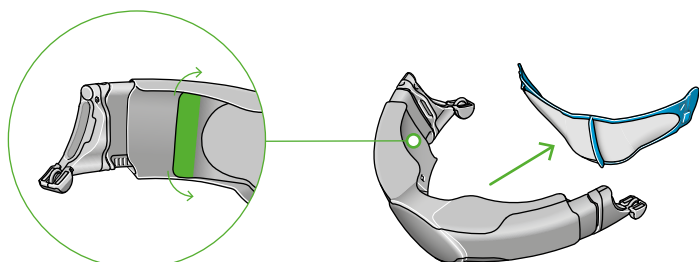

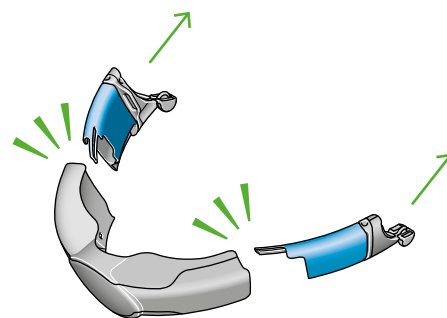

Regular cleaning

Remove the visor
Push the visor down and gently pull it away from the ear cups.

Pinch the outer edges of the mesh until it pops out of the visor.

Slide the side extensions out
and unclip from the visor.

Wash visor
Wash the visor and mesh with warm water and
dish soap. Use the Dyson visor cleaning brush
to reach all areas.

Rinse all parts thoroughly.

x2

Dry visor
Leave your visor to dry in
a well-ventilated, warm place.
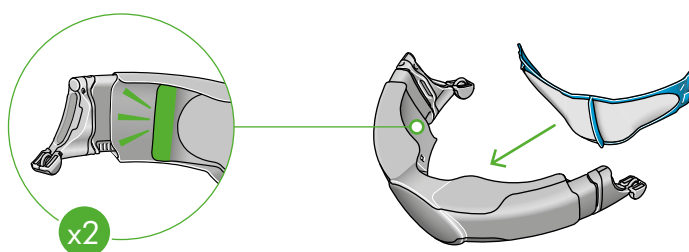

Reassembling
your headphones

Reassemble visor
Make sure all parts of your visor are completely
dry before reassembling.

Slide in side extensions until they click
into position.

Clip in the inner mesh.

x2

Reattach the visor to your headphones.

x2
